

Grand Opening!

CMC-KUHNKE, Inc. opens new offices in Albany, NY

On July 14th, 2009, CMC-KUHNKE, Inc. celebrated the Grand Opening of its new location in Albany, New York.

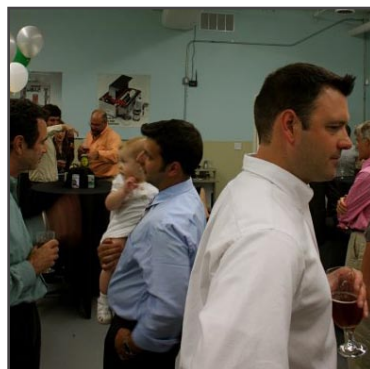

The improved facilities and strategic location in Downtown Albany will allow CMC-KUHNKE to continue its rapid sales growth as well as to maintain its industry leading level of customer support.

A ribbon cutting ceremony and champagne toast followed an introduction from Mark Eagan, President/CEO of Albany-Colonie Regional Chamber. Inspirational words mixed in with some laughs were heard from Heinz and Alex Grossjohann, President and Vice President of CMC-KUHNKE, respectively. Alex introduced CMC-KUHNKE's new Marketing Coordinator Maura Bress as the first in a series of new hiring – facilitated by the move to Albany.

Neighboring businesses, customers, local vendors, friends and family gathered in the production lab where refreshments and demonstrations of CMC-KUHNKE products were offered.

The Grand Opening celebration was a great success. To all of those that attended, we thank you for your support. Please remember that our customers are always welcome to visit our new facilities. Stop by anytime!

CMC-KUHNKE is on Facebook! Check us out for more photos from the Grand Opening Party.

VSM-5 Video SEAM Monitor 5 Automatic, Computerized, Seam Monitor for Double Seam Inspection

The first automatic double seam monitor. The VSM-5 features pre-configured and integrated Micro-Laptop and automatic SEAMview software!

**Automatically measure
double seam images in
less than ONE SECOND!**

The VSM 5 utilizes auto SEAMview software to automatically measure the double seam. The software is installed on a micro-laptop connected to CMC-KUHNKE's latest VSI-5000 series imagers – featuring high resolution, USB or Firewire cameras.

The SEAMview software starts automatically making this a complete, all-in-one double seam inspection solution. With the software doing all the work the system requires no training or installation.

The automatic measurement increases accuracy by up to 5 times, and allows double seams to be measured in a fraction of the time required using a traditional Video SEAM Monitor.

Features:

- High Resolution Camera (color optional)
- Pre-Configured auto SEAMview Software for automatic double seam measurement
- Micro-Laptop with robust solid state hard-drive, 8.5" monitor, Windows XP
- Customizable Options include can tables for food, beverage, aerosol cans

More **NEW** products for 2009

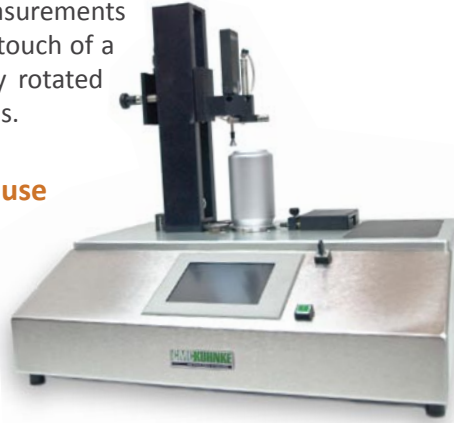

BES-1000

Back End Set Up Gauge

Measure more accurately with this operator-independent, Plug Diameter, Can Height, Flange Width and Flange Diameter measurement system for finished beverage cans. All measurements are taken automatically at the touch of a button. Cans are automatically rotated to measure at multiple positions.

Gauge quickly adjusts for use with multiple can heights.

This semi automatic can measurement system is available as a stand alone gauging unit with a digital display or for transfer directly into Visionary QC or data acquisition software. The gauge is designed to allow for automatic loading if desired.

BBG-1300SH

Scroll Sheet Measurement Gauge

The new BBG-1300SH allows for the quick, accurate, and repeatable measurement of scroll sheets. Scroll dimensions are easily measured using the included footswitch.

Measurement types and parameters are pre-programmed for each sheet type. Measurement results are displayed live on an easy to read LCD screen. RS 232 output is available for data export.

The extremely accurate yet robust gauge is equipped with 4 Heidenhain probes as well as a linear slide. This allows the measurement of Squareness (measured at two locations), Sheet Height, Sheet Thickness, and 2 Scroll Dimensions.

Sheets up to 1200mm x 1200mm can be easily measured.

Trade Shows 2009

We hope to see you at one of the many trade shows CMC-KUHNKE will be attending in 2009.
